

Manual Bin Tipping

KW Manual Bin Tipper

The KW Manual Bin Tipper is the essential entry point in our bin tipping range, designed with simplicity and strength to meet your operational needs.

Key Features:

- **Durable Construction:** Complete Stainless Steel Frame ensures longevity and resilience in demanding environments. Powered by a reliable hydraulic system for smooth and controlled tipping.
- **Customisable Bin Dimensions:** Setup to suit customer bin dimensions for a tailored fit and optimal operation.
- **User-Friendly Controls:** Equipped with a push-button control board for straightforward raise/lower operation. The operator manually initiates the tip after placing the bin in position, allowing for precise control. Choose with or without a bin door that can be in a fixed position or hydraulically operated, depending on the requirements of your produce and workflow.
- **Floor-Level Access:** Positioned at floor level for easy loading, bins can be fed using a forklift or pallet jack.
- **Two-Year Warranty:** Comes with a two-year warranty, ensuring peace of mind and dependable service.
- **Australian Made:** Proudly designed and manufactured in Australia, built for reliability in demanding environments.

KW's Manual Bin Tipper combines durability with ease of use, providing a practical and efficient solution for bin tipping at your operation.
